

MARATHON PIPE LINE LLC

Marathon Pipe Line LLC (MPL) manages one of the largest petroleum pipeline networks in the U.S., based on total volume delivered. MPL operates pipeline systems that move crude oil from production fields, other pipeline companies and offshore platforms to MPC refineries, other refineries and other pipeline systems. MPL also operates pipeline systems that move refined products from refineries to product terminals.

MPL owns, operates, leases or has an ownership interest in approximately 9,600

miles of pipeline, comprising 68 systems in 15 states and federal waters.

MPC delivers more than 2.8 million barrels of crude oil and petroleum products daily through these pipelines. High-speed computers, constantly evolving technology and satellite communications enable the company to monitor and control its many pipeline systems throughout the U.S. from a single control center.

The MPL and Ohio River Pipe Line (ORPL) wholly-owned and undivided interest common carrier systems consist of 1,707 miles

of crude oil lines and 1,825 miles of refined products lines. MPC also owns 175 miles of private crude oil pipelines and 846 miles of private refined products pipelines and leases 217 miles of common carrier refined product pipelines. MPL operates most of these pipelines.

Marathon Petroleum also has partial ownership interests in several pipeline companies that have approximately 110 miles of crude oil pipelines and 3,600 miles of refined products pipelines, including about 970 miles operated by MPL.
