

Texas City, Texas*Crude capacity: 76,000 bpd*

The Texas City refinery was built in 1931 and was acquired by Marathon Oil Company (then The Ohio Oil Company) in 1962 from Plymouth Oil Company. It is located on Galveston Bay, off the entrance to the Houston Ship Channel.

Refinery operations include crude distillation, catalytic cracking, alkylation, reforming, aromatics extraction and sulfur recovery. A sweet crude refinery, the product mix includes gasoline, distillate, naphtha, light cycle oil, propane, slurry, propylene, benzene, toluene, xylene and sulfur. It is a full-conversion refinery.
