1. IDENTIFICATION

Product Name: Marathon Petroleum Petroleum Coke
Synonym: Petroleum Coke; Green Coke
Product Code: 0109MAR019
Chemical Family: Carbon
Recommended Use: Fuel.
Restrictions on Use: All others.

Manufacturer, Importer, or Responsible Party Name and Address:
MARATHON PETROLEUM COMPANY LP
539 South Main Street
Findlay, OH 45840
SDS information: 1-419-421-3070
Emergency Telephone: 1-877-627-5463

2. HAZARD IDENTIFICATION

Classification

OSHA Regulatory Status
This chemical is considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

<table>
<thead>
<tr>
<th>Hazard Analysis</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Combustible dust</td>
<td>OSHA defined hazard</td>
</tr>
</tbody>
</table>

Hazards Not Otherwise Classified (HNOC)
Not applicable.

Label elements

**EMERGENCY OVERVIEW**

**Warning**
May form combustible dust concentrations in air (during processing)

**Appearance** Black Porous Chunks or Powder
**Physical State** Solid
**Odor** Slight Hydrocarbon

Precautionary Statements - Prevention
Minimize dust generation and accumulation
Keep away from all ignition sources including heat, sparks and flame. No Smoking
Clean as needed to prevent hazardous accumulation or dispersion of fugitive dust
Bond and ground containers, equipment and/or conducting surfaces to minimize and dissipate electrostatic charge
When necessary, employ explosive force dissipation design to vent away from other combustibles

Precautionary Statements - Response
Avoid contact with eyes and breathing of dust.
In case of fire: Use portable spray hose nozzles that are listed or approved for use on Class C fire for extinction for extinction

Precautionary Statements - Storage
Store in a cool and well-ventilated area
Wetting will suppress dust release

Precautionary Statements - Disposal
Dispose of contents/container at an approved waste disposal plant

3. COMPOSITION/INFORMATION ON INGREDIENTS

Composition varies depending on source of final product. Polycyclic aromatic hydrocarbons (3-7 ring), such as benzo(a)pyrene, are present in trace concentrations (<0.1%).

Composition Information:

<table>
<thead>
<tr>
<th>Name</th>
<th>CAS Number</th>
<th>% Concentration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Petroleum Coke</td>
<td>64741-79-3</td>
<td>100</td>

</tr>
</tbody>
</table>

All concentrations are percent by weight unless material is a gas. Gas concentrations are in percent by volume.

4. FIRST AID MEASURES

First Aid Measures

General Advice: In case of accident or if you feel unwell, seek medical advice immediately (show directions for use or safety data sheet if possible).

Inhalation: Remove to fresh air. If not breathing, institute rescue breathing. If breathing is difficult, ensure airway is clear, give oxygen and continue to monitor. If heart has stopped, immediately begin cardiopulmonary resuscitation (CPR). If symptoms or irritation occur, call a physician.

Skin Contact: Wash skin with plenty of soap and water. Get medical attention if irritation persists. Wash contaminated clothing before re-use.

Eye Contact: Flush immediately with large amounts of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Gently remove contacts while flushing. Get medical attention if irritation persists.

Ingestion: Rinse mouth out with water. If symptoms develop, seek medical attention.

Most important signs and symptoms, both short-term and delayed with overexposure

Adverse Effects: Dust may be a mechanical irritant.

Indication of any immediate medical attention and special treatment needed

Notes To Physician: Treat symptomatically.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media
Portable spray hose nozzles that are listed or approved for use on Class C fires shall be provided in areas that contain dust, to limit
the potential for generating unnecessary airborne dust during fire-fighting operations. Personnel shall be trained to use portable extinguishers in a manner that minimizes the generation of dust clouds during discharge. Firefighting should be attempted only by those who are adequately trained and equipped with proper protective equipment.

**Unsuitable extinguishing media**
Straight-stream nozzles shall not be used on fires in areas where dust clouds can be generated.

**Specific hazards arising from the chemical**
May form combustible dust concentrations in air. Fine dust dispersed in air, in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. Non-sparking tools/equipment should be considered when a potentially combustible dust environment exists.

**Hazardous combustion products**
Smoke, carbon monoxide, and other products of incomplete combustion.

**Explosion data**
- **Sensitivity to Mechanical Impact**: No.
- **Sensitivity to Static Discharge**: Yes.

**Special protective equipment and precautions for firefighters**
Firefighters should wear full protective clothing and positive-pressure self-contained breathing apparatus (SCBA) with a full face-piece, as appropriate. Avoid generation and accumulation of dust when handling this material. Refer to NFPA 654 Standard for Prevention of Fire & Dust Explosions. Avoid using straight water streams. Water spray and foam (AFFF/ATC) must be applied carefully to avoid frothing and from as far a distance as possible. Keep surrounding area cool with water spray from a distance and prevent further ignition of combustible material. Avoid excessive water spray application. Keep run-off water out of sewers and water sources.

**Additional firefighting tactics**
Not applicable.

### 6. ACCIDENTAL RELEASE MEASURES

**Personal precautions:**
Keep people away from and upwind of spill/leak. Dust deposits dispersed into the atmosphere in sufficient concentration may form an explosive mixture. Eliminate all ignition sources. Ensure adequate ventilation.

**Protective equipment:**
Use personal protection measures as recommended in Section 8.

**Emergency procedures:**
Advise authorities and National Response Center (800-424-8802) if the product has entered a water course or sewer. Notify local health and pollution control agencies, if appropriate.

**Environmental precautions:**
Avoid release to the environment.

**Methods and materials for containment:**
Prevent dust cloud. Cover powder spill with plastic sheet or tarp, or keep wetted to minimize dispersion of powder.

**Methods and materials for cleaning up:**
Sweep up and shovel into suitable containers for disposal. If disturbed, dust on surfaces can be dispersed and form explosive mixtures in the air, e.g. compressed air cleaning. Ensure all equipment is bonded and grounded. Use only non-sparking tools.

### 7. HANDLING AND STORAGE

**Safe Handling Precautions:**
To avoid the combustible dust hazard, minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations and cause an electrical spark. Provide adequate precautions, such as electrical grounding and bonding, or nonreactive atmospheres. Use non-sparking tools.
Avoid contact with eyes. Avoid breathing dust. Refer to applicable EPA, OSHA, NFPA and consistent state and local requirements.

Storage Conditions:
When stored indoors keep in a cool, well-ventilated area. Do not expose to heat, open flames, strong oxidizers or other sources of ignition. Petroleum Coke may be stored outdoors with proper provisions for containment. Wetting will suppress dust release.

Incompatible Materials
Strong oxidizing agents.

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

<table>

<td></td>
<td></td>
</tr>
</tbody>
</table>

Notes: The manufacturer has voluntarily elected to provide exposure limits contained in OSHA’s 1989 air contaminants standard in its SDSs, even though certain of those exposure limits were vacated in 1992.

Engineering measures:
Local or general exhaust required in an enclosed area or when there is inadequate ventilation. Use mechanical ventilation equipment that is explosion-proof.

Personal protective equipment
Eye protection: Dust goggles if use produces excessive dust/fume concentrations.
Skin and body protection: Protective disposable gloves to prevent skin exposure.
Respiratory protection: Use a NIOSH approved air-purifying respirator equipped with P100 particulate filter or a supplied air respirator when there is the potential for airborne exposures to exceed permissible exposure limits or if excessive dust or fumes are generated.

Hygiene measures: Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes and clothing.

10. STABILITY AND REACTIVITY

Reactivity
The product is non-reactive under normal conditions.

Chemical stability
The material is stable at 70°F (21°C), 760 mmHg pressure.

Possibility of hazardous reactions
None under normal processing.

Hazardous polymerization
Will not occur.

Conditions to avoid
Excessive heat, sources of ignition, open flame.

Incompatible Materials
Strong oxidizing agents.

Hazardous decomposition products
None known under normal conditions of use.

11. TOXICOLOGICAL INFORMATION

Potential short-term adverse effects from overexposures

Inhalation
Inhalation of dust may cause irritation of the respiratory system.

Eye contact
Dust may cause mechanical irritation of the eye.

Skin contact
No known hazard in contact with skin.

Ingestion
May cause irritation of the mouth, throat and gastrointestinal tract.

Acute toxicological data

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Petroleum coke was found not to be carcinogenic in monkeys and rats in a two-year inhalation study at concentrations up to 30 mg/m³. Chronic inflammatory changes similar to those produced by non-specific respiratory irritants were observed in some rats at the highest exposure level. Chronic skin painting studies of coke dust in mice did not produce evidence of carcinogenicity. Petroleum coke (delayed process and fluid process) was found not to be mutagenic in a rat in vivo bone marrow cytogenetic test, a mouse lymphoma assay and an Ames mutagenicity assay.
Adverse effects related to the physical, chemical and toxicological characteristics

Signs and Symptoms
Dust may be a mechanical irritant.

Sensitization
Not expected to be a skin or respiratory sensitizer.

Mutagenic effects
None known.

Carcinogenicity
None known.

Cancer designations are listed in the table below

<table>

Persistence and degradability
No information available.

Bioaccumulation
No information available.

Mobility in soil
No information available.

Other adverse effects
No information available.

13. DISPOSAL CONSIDERATIONS

Description of Waste Residues
No information available.

Safe Handling of Wastes
Handle in accordance with applicable local, state, and federal regulations.

Disposal of Wastes / Methods of Disposal
The user is responsible for determining if any discarded material is a hazardous waste (40 CFR 262.11). Dispose of in accordance with federal, state and local regulations.

Methods of Contaminated Packaging Disposal
Empty containers should be completely drained and then discarded or recycled, if possible. Dispose of in accordance with federal, state and local regulations.

14. TRANSPORT INFORMATION

DOT (49 CFR 172.101):
- **UN Proper Shipping Name:** Not Regulated
- **UN/Identification No:** Not applicable
- **Class:** Not applicable.
- **Packing Group:** Not applicable.

TDG (Canada):
- **UN Proper Shipping Name:** Not Regulated
- **UN/Identification No:** Not applicable.
- **Transport Hazard Class(es):** Not applicable.
- **Packing Group:** Not applicable.

15. REGULATORY INFORMATION

US Federal Regulatory Information:

US TSCA Chemical Inventory Section 8(b):
This product and/or its components are listed on the TSCA Chemical Inventory.

EPA Superfund Amendment & Reauthorization Act (SARA):

SARA Section 302:
This product does not contain any component(s) included on EPA's Extremely Hazardous Substance (EHS) List.

<table>
<thead>
<tr>
<th>Name</th>
<th>CERCLA/SARA - Section 302 Extremely Hazardous Substances and TPQs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Petroleum Coke</td>
<td>NA</td>
