

SUSTAINABILITY DRIVEN

KENAI REFINERY SUSTAINABILITY HIGHLIGHTS

Located along the Cook Inlet, approximately 60 miles southwest of Anchorage, Alaska, our Kenai refinery plays a vital role in fueling the state. It primarily processes Alaska domestic crude, supplemented with a variety of domestic and international crudes. The refinery supplies high quality fuel and fuel products that meet the needs of Alaskans across the state.

At Kenai, our success is driven by a strong culture of safety, environmental stewardship, collaboration and deep-rooted community partnerships. Products at the refinery are distributed efficiently throughout Alaska — and beyond — by rail, marine vessels, pipelines and terminals.
