

Gallup Refinery

Overview

Marathon Petroleum Corp.'s (MPC) Gallup refinery is located near Gallup, New Mexico, and is the only active refinery in the Four Corners area. The crude oil capacity of the refinery is approximately 26,000 barrels per calendar day (bpcd).

The Gallup refinery primarily processes high-quality crude known as Four Corners Sweet into gasoline, distillate, heavy fuel oil and propane. Products from the refinery are distributed via transport truck and rail.

Health, Safety & Environment

- > On-site lab certifies finished products to meet all government specifications and regulations
- > Enforce a disciplined framework that includes comprehensive design, engineering, operating and maintenance practices. Industry-recognized methodologies used to assure process safety and asset integrity, and to reduce the risk of incidents

Community

- > Strive to make a positive and ongoing impact on the lives of our neighbors with programs and practices that provide meaningful support to the community
- > Supported more than 30 area organizations, including Big Brothers Big Sisters, Community Pantry, Humane Society, Future Foundations Family Center, Greater Gallup Economic Development Corp and Western Health Foundation
- > Provided more than \$100,000 in annual community investment funds to non-profit organizations in 2018
